Smart Dehumidification (SMD)

Save energy and money, thanks to smart dehumidification. The dehumidifier chooses automatically the ideal humidity levels depending on the temperature, while ensuring low energy consumption and perfect conditions in your place.

Clothes Drying

Dry your clothes effectively and healthy, with the Dryer operation. Place the clothes horse in a small room (with the door closed) and activate Clothes drying program. The air produced reinforces freshness and ensures dry and fragrant clothes in a short period of time, while maintaining the room completely dry.

Turbo

Get rid off humidity even at the most difficult cases. The technological upgraded Turbo Mode enhances extraction for air that in a short time to restore the ideal moisture levels in your area.

Overflow Protection

Enjoy the safe operation of your dehumidifier thanks to the special equipment for protection from overflow. When the water tank is full, the dehumidifier automatically switches off and the indication Full illuminates, so as to inform you that you must empty the water tank, preventing any leakage.
